Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2, drawn to a cleaning device with an oscillating dustpan portion, classified in class 15, subclass 41.1.
 - II. Claim 3, drawn to a cleaning device with a handle connection point at a location relative to a gravity point position, classified in class 15, subclass 41.1.
 - III. Claim 4, drawn to a cleaning device with a roll supporting structure, classified in class 15, subclass 41.1.
 - IV. Claims 5-6, drawn to a cleaning device with a dustpan provided with a plurality of grooves, classified in class 15, subclass 41.1.
 - V. Claims 7-9, drawn to a cleaning device with mixed-fiber bristles, classified in class 15, subclass 41.1.
 - VI. Claims 10, drawn to a cleaning device with a dustpan portion including guide shoes, classified in class 15, subclass 41.1.
 - VII. Claims 11-13, drawn to a cleaning device with an adhesive roll and a rotating body constituted by a supporting shaft, classified in class 15, subclass 41.1.
 - VIII. Claims 14-22, drawn to a cleaning device with a speed increasing means, classified in class 15, subclass 41.1.

The inventions are distinct, each from the other because of the following reasons:

Each of the groups of claims identified above relate to different and independent aspects of the present application not specifically related to each other with the subject matter common to each of the groups (for example the scraping up body and a frame as in groups I and II) being known in the art.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

See below Upon the Election of either Group IV or Group VIII

3. This application contains claims directed to the following patentably distinct species of the claimed invention: Upon the election of Group IV, one of the embodiments of Figs 10(A), 10(B) and 10(C); and Upon the election of Group VIII, one of the speed increasing means of Figs 21 and 29.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 5 is, for example, generic to the embodiments of Figs 10(A-C).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Spisich whose telephone number is (571) 272-1278. The examiner can normally be reached on M-Th (5:30-3:00), Alternate Fri off.
